Climate and Crop Bulletin

Of the Weather Bureau, Missouri Section, U. S. Department of Agriculture, for the Month of November,

The exceptionally pleasant weather which characterized the month of October, 1901, continued throughout the month of November. There were some sharp frosts but no severe freezing weather. The mean temperature of the month differed but little from the normal, but over the greater part of the state the precipitation was deficient, many of the northern and western counties receiving less than one inch. The heaviest rains fell in the southern countles where, in a few lacalities, the total for the month ranged from two to four inches.

In most of the western counties wheat has made good growth and is in a very promising condition, but in nearly all of the central and eastern counties its growth has been retarded by the dry weather, and in a few counties the stand is yery poor and the outlook is discouraging. In general, however, the crop is looking well, considering the light rainfall. In some of the southwestern counties much wheat has been pastured. Slight damage by fly is reported in a few counties, and worms have also caused some injury in a few of the southern counties. Considerable corn still remains in shock in the fields but is in good condition, except where damaged by worms. In most sections the weather has been too dry for busking. Much corn has been shredded. Cotton picking, in the southeastern counties, is practically completed. Fall pastures have afforded considerable feed in portions of the western and southern sections, but over the greater portion of the state they have been very poor. Stock water is now more plentiful in some of the southern counties, but in most sections it contiques very scarce. Considerable fail plowing has been done in some districts, but in many counties the ground has been too A. E. HACKETT, Section Director.

Rev. Irl R. Hicks Is Not Dead.

Notwithstanding a widely current rumor that the Rev. Irl R. Hicks was dead, he never was in better health, and never did a harder or more successful year's work than that just closing. He has just completed his large and splendid Almanac for 1902 and, with his staff of able helpers, has brought his journal "Word and Works," justly forward into international reputation. For a quarter of a century Mr. Hicks has grown in reputation and usefulness as the people's astronomer, and forecaster of storms and the character of coming seasons. Never were his weather forecasts so sought after as now, his timely warning of a serious drouth this year having saved the people from loss and suffering. Millions of bushels of wheat were harvested through his advice to plant crops that would mature early. The American people will certainly stand by Prof. Hicks, when it costs them so little and the benefits are so great. His fine almanae of 200 pages is only 25 cents, and his splendid family tournal is only one dollar a year including the almanac. A Medicine for

Old People.

Rev. Geo. Gay, Greenwich, Kas., is past 83 years of age, yet he says: "I am enjoying excellent health for a man of my age, due entirely to the rejuvenating influences of Dr. Miles' Nervine. It brings sleep and rest when nothing else will, and gives strength and vitality even to one of my old age."

"I am an eld soldier," writes Mr. Geo. Watsen, of Newton, Ia., "and I have been a great sufferer from nervousuess, vertigo and spinal trouble. Have spent considerable money for medicine and doctors, but with little benefit. I was so bad my mind showed signs of weakness. I began taking Dr. Miles' Nervine, and I know it saved my life."
